

H. Pylori (C13 Urea) Breath Test

Your Doctor has asked you to have a Breath Test to look for H. Pylori which can cause Gastritis or Stomach Ulcers.

This test will take approximately 15 minutes.

Before the test:

Please talk to your Doctor before stopping any medications.

Stop taking antibiotics or bismuth (eg. DeNol) for 4 weeks.

Stop taking sucralfate or proton pump inhibitors (eg. Losec, Zoton, Somac) for 2 weeks.

Please do not eat, drink, chew gum or smoke for 6 hours before your test.

During the test:

Please do not eat, drink, chew gum or smoke.
